

Hybrid School Label Certification – Coming Soon

The HYBRID SCHOOL LABEL produced by STEAME goes HYBRID will be a brand-new certification aimed to attest the appropriate level of hybrid education readiness reached by schools.

The Blueprint Guidelines for Hybrid STEAME activities and the Training programme for facilitating the implementation of STEAME Learning and Creativity Plans will contribute to the identification of the eligibility criteria to be fulfilled in order to obtain the label.

Schools applying for the Hybrid Label will undergo a thorough process of self-evaluation of their hybrid/digital accomplishments at multiple levels, prompting a holistic analysis of their current digital performance provided by all the different subjects of its community (executives, board members, teachers, administrative personnel).

In this context, the Quality Label will be aligned with the principles of “Quality assurance for school development”, a reference document produced by the ET 2020 Working Group on School Education aimed to guide policy development on quality assurance in school education (https://www.schooleducationgateway.eu/downloads/Governance/2018-wqs2-quality-assurance-school_en.pdf)

The Hybrid School Label responds to the need to take further the hybrid readiness within EU schools, providing new and valuable evidence from the project experience. In particular, it will address the issue of schools’ hybrid transformation process within the context of the emergency brought by the COVID19 pandemic, highlighting the main challenges and opportunities faced in this regard. The focus will be placed not only on the need to procure modern high-level digital tools and services, but also on the provision of digital competences for the full school community. Digital education readiness, in fact, should be seen as a regular process rather than a final result to be reached. The Hybrid Label will produce the effect of acknowledging and showcasing the commitment of that particular school towards high-quality digital education.

The project consortium is currently working on developing the label, follow us and stay tuned, the certification process will be available in a few months!
